# Industry-focused Future-proof Customized

Manufacturing is the driving force in our fast-moving, connected world. More so than nearly any other sector of the economy, industry lies at the heart of continuous innovation and change. To survive long term, you have to be able to react to ever-changing developments and conditions flexibly and with foresight. The highest level of economic know-how is just as indispensable here as powerful machines and reliable production facilities.

With over 60 years of experience in the development, production and sale of smart cable management systems and individual components, at murrplastik® we support companies worldwide in optimizing their work processes.

**For the customers, this means protected investments, long-lasting machines and shorter down-times as the basis for a future-proof, up-to-date corporate development.**

# We create room for progress

## Simply Smart Systems

Building on the development of the first computer-assisted labeling system and our decades of experience in the field of intelligent cable management, murrplastik® offers not only individual solutions but also complete cable management solutions - everything from one source.

In close cooperation with our experts, we will find the optimum solution for you and your requirements. Comprehensive consulting is just as much a part of our service portfolio as the rapid implementation, maintenance and support of the systems in case of a service issue.

**That is how we can ensure the basis for the modern, future-proof, progressive growth of your company.**

## Fire protection according to EN 45545-2 standard

According to the EN 45545-2 standard, murrplastik® products for rail vehicles meet the requirements for:

- **Oxygen index**  
according to T01 EN ISO 4589-2:01
- **Smoke proof tightness**  
according to T 10.03 EN ISO 5659:25 kWm<sup>2</sup>
- **Toxicity**  
according to T 12 NF X70-100-1 and -2 600°C

The values are recorded in the classes R22 and R23 depending on their installation site. The classification is made in the hazard levels HL 1; HL 2; HL 3. Hazard level HL 3 is the class with the highest requirements.

Abbreviation requirements	Test method reference	Parameter unit	Requirement Definition	HL1	HL2	HL3
<b>R 22</b>	T01 EN ISO 4589.2:01	Oxygen content vol.%	Minimum	28	28	32

<b>Heat-shrink conduit</b> for labeling	HL 3	HL 3	HL 3	HL 3	HL 3	HL 3
<b>Other Labeling</b>	Based on Table 2 R 26					

## Requirements for non-listed components

### According to the exposed area and location in the vehicle

Exposed area	Location	Requirement set in table 5
> 0.20 m <sup>2</sup>	inside	R 1
> 0.20 m <sup>2</sup>	outside	R 7
≤ 0.20 m <sup>2</sup>	inside	R 22
≤ 0.20 m <sup>2</sup>	outside	R 23

The detailed classification reports for each product can be downloaded from the catalog pages via QR codes and interactive download links.

## Fire closure W, I, E according to EN 45545-3

The EN 45545 standard provides for additional tests for products subject to fire closure. The tests were carried out according to the principles of DIN EN 1363-1.

### ROOM INTEGRITY -E-

The room integrity defines the period of time over which a component or control cabinet must be flameproof. The E-value indicates the length of time a component or enclosure will remain flameproof.

### THERMAL INSULATION -I-

The I-value indicates the duration of the thermal insulation, i.e. the time until a temperature increase above 180 °C occurs on the product on the side facing away from the fire.

### Heat radiation -W-

The W-value indicates the duration of heat radiation, i.e. the minutes until the specified heat radiation of 15 kW/m<sup>2</sup> is exceeded on the side facing away from the fire.

The products are tested in vertical and horizontal installation position.

Our cable entry systems and the cable protection system are subject to this standard.

With the solutions in the area of cable entry system and cable protection system we exceed the required values of T= 15 min

### Cable protection systems

E20

### Cable entry systems

E60; I45; W45

To fix the position of the cables, strain reliefs must be provided at a distance of 200 mm from the room integrity.

## Fire protection in accordance with North American standards

In addition to the European standard EN 45545, murrplastik completed testing of the range for rail vehicles in accordance with North American fire protection standards in 2023:

### NFPA 130:2020

Standard for Fixed Guideway Transit and Passenger Rail Systems  
Chapter 8 - Vehicles

### ASTM E 162:2016

Standard Test Method for Surface Flammability of Materials Using a Radiant Heat Energy source

### ASTM E 1354:2017

Standard Test Method for Heat and Visible Smoke Release Rates for Materials and Products Using an Oxygen Consumption Calorimeter

### ASTM E 662:2017

Standard Test Method for Specific Optical Density of Smoke Generated by Solid Materials

### Bombardier SMP 800-C Rev. 6:2009.08.31

Toxic Gas Generation from Material Combustion

### BSS 7239:1988

Test method for toxic gas generation by materials on combustion  
Determination of the concentration of cyanide, chloride, and fluoride ions in solutions from combustion

The detailed test reports for each product can be downloaded from the catalog pages via QR codes and interactive download links.

# Set your course for success

**Every day, millions of people and goods travel by rail.**

To get from A to B smoothly, good organization is necessary, as is the use of reliable materials and technology.

Conduit fitting  
**M-PRO**

# We combine quality and performance

As the only company specializing in cable management systems, murrplastik® produces all our products for rail transport in compliance with the European fire protection standard DIN EN 45545-2 with 3x HL3 as well as in accordance with EN 45545-3 for room integrity, thermal insulation and thermal radiation.

To ensure the longest possible service life of rail vehicles and to protect human life, we offer particularly high-quality, resistant materials and products for both indoor and outdoor use.

Conduit fitting  
**M-PRO**

## Highly dense and cable-friendly.

Our innovative conduit fitting series M-PRO convinces not only with its high density and cable-protecting inner sides, but also with its high fire protection, optimum ease of assembly, impact and tear-out resistance, as well as a wide range of variants.

Product details and information at a click

[murrplastik.de/hero-produkt/m-pro/](http://murrplastik.de/hero-produkt/m-pro/)

# Opt for the premium class:

Our innovative conduit fitting series M-PRO convinces not only with its high density and cable-protecting inner sides, but also with its high fire protection, optimum ease of assembly, impact and tear-out resistance, as well as a wide range of variants.

## Features:

- Highly dense up to IP68 at 6 bar and IP69K
- Cable-friendly, without sharp edges
- Allows very high packing density
- Highest fire protection

(electric locomotive)

# Conduits and Fittings

## Corrugated conduits

**EWL-PAB** – flexible and lightweight design for railroad applications.

**EW-PRT** – robust and cold-resistant design for high-frequency mechanical loads in outdoor use

The protection conduits meet the specifications of EN 45545-2 with a Class R22 and R23 ranking according to hazard level 3x HL3 resp. HL2

## Fittings

The M-PRO fitting series was developed together with leading rail vehicle manufacturers.

### Featured advantages of the conduit fitting systems:

- High tightness IP 68 up to 6 bar and at the same time IP 69 K without further attachments according to DIN EN 60529.
- Quick assembly:  
Insert conduit, snap-in → ready.
- No parts can get lost → Delivered completely assembled.
- Clamping along entire circumference, ensuring maximum tensile strength

All fittings meet the specifications of EN 45545-2 with a Class R22 and R23 ranking according to hazard level 3x HL3.

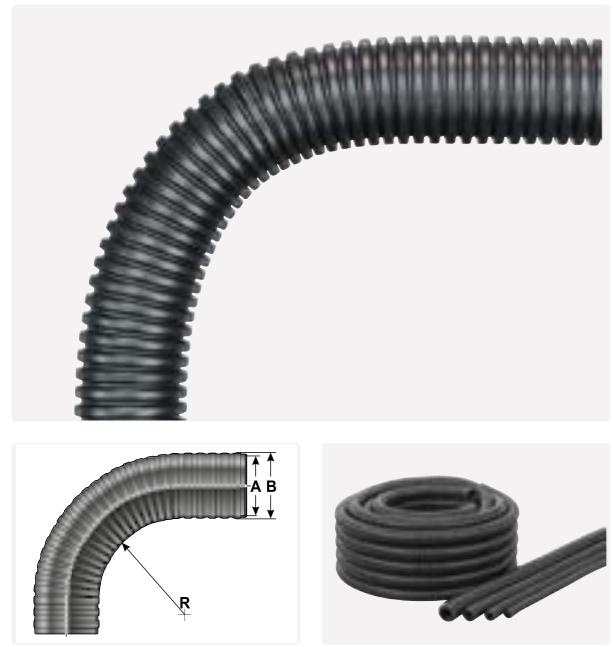

### Room integrity according to DIN EN 1363-1:2012-10

In EN 45545, the room integrity according to DIN EN 1363 1:2012-10 has a special significance. This defines the period of time over which a control cabinet or component must ensure flame tightness. The RAB 30 room integrity strip, allowed murrplastik to pass testing at the MPA Dresden. The requirement was a minimum of E20.

This ensures that a control cabinet or a component will meet the room integrity requirements as specified in DIN EN 1363-1:2012-10, when using RAB 30 and a M-PRO fitting.

The system is rounded off by the stable holders. They may be mounted linked together and therefore take up less space. Since their tops swivel or may be completely removed, they have clear installation benefits compared to the competition.

This product also meets the requirements of EN 45545-2 3x HL3.

### Product information

The EWL-PAB cable protection conduits are made of specially modified polyamide 6. The material is halogen, phosphor and cadmium-free. The affordable EWL-PAB cable protection conduits are characterized by their excellent self-extinguishing properties and high crush and impact resistance. For static applications involving low to medium mechanical loads.

#### Applications:

- Plant engineering
- Mechanical engineering
- Vehicle engineering

### Material properties

#### Material properties

Material: Modified polyamide PA 6

#### High angle consistency

Crush resistance: >550 N

Tread: 50 x 50 mm

Testing method: Based on IEC EN 61386

Test value: M25/P21

Test conditions: Testing at 23 °C

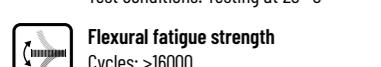

Crush resistance: >950 N

Tread: 100 x 100 mm

Testing method: Based on IEC EN 61386

Test value: M25/P21

Test conditions: Testing at 23 °C

#### Flexural fatigue strength

Cycles: >16000

Testing method: Based on IEC EN 61386

Test value: M25/P21

Test conditions: Testing at -45 °C

#### Impact strength

Tier: 3

Testing method: Based on IEC EN 61386

Test value: M25/P21

Test conditions: Testing at -25 °C

#### System tear-out strength

System tear-out strength: >310 N

Testing method: Based on IEC EN 61386

Test value: M25/P21

Test conditions: Testing at 23 °C

#### Thermal properties

Temperature / temperature range  
-45 °C - 120 °C, short-term: 160 °C

#### Chemical resistance

Resistant to:

Alcohols, mineral oils, greases, fuels

### Fire behavior

**Fire behavior** Fire classification according to UL 94: VO self-extinguishing

#### Fire properties as per EN 45545-2

Classification: C.I.T. R22 / R23 HL3

Value: 0.61

Testing method: NF X 70-100-1/-2 600°C (1112 °F)

Classification: Ds (max.) R22 / R23 HL3

Value: 68

Testing method: ISO 5659-2 (25KW/m<sup>2</sup>)

Classification: LOI R22 / R23 HL3

Value: ≥ 32 %

Testing method: ISO 4589-2

### Product information

Experience the innovation of EW-PRT cable protection conduits, specially designed for demanding cable protection. Made from innovative polyamide 12, they offer outstanding UV protection and exceptional resistance to mechanical impact. Their excellent fire protection properties meet the highest requirements in the rail transportation sector, performing reliably even under extreme conditions down to -50°C. Ideal for use in environments that require robust and secure solutions.

### Product information

The EWT-PAB cable protection conduits are made of specially modified polyamide 6. The material is halogen, phosphor and cadmium-free. Due to its excellent fire protection properties and very low smoke emission, this product can be used in railway technology and for static applications with medium to high mechanical stress.

- The EWT-PAB cable protection conduits consist of a two-part, slotted conduit system and are characterized by the following advantages:
- The cable protection conduits can be opened and closed again at any time.
- Mounting of pre-assembled cables
- Retrofitting or repair in mechanical and plant engineering

### Material properties

#### Material properties

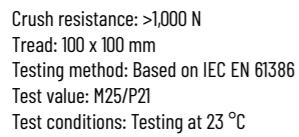

Material: Modified polyamide PA 6

#### High angle consistency

Crush resistance: >650 N

Tread: 50 x 50 mm  
Testing method: Based on IEC EN 61386  
Test value: M25/P21  
Test conditions: Testing at 23 °C

#### Flexural fatigue strength

Cycles: >1,200

Testing method: Based on IEC EN 61386  
Test value: not specified  
Test conditions: not specified

#### Impact strength

Level: not specified

Testing method: Based on IEC EN 61386

Test value: M25/P21

Test conditions: Testing at -25 °C

#### System tear-out strength

System tear-out strength: >540 N

Testing method: Based on IEC EN 61386

Test value: M25/P21

Test conditions: Testing at 23 °C

#### Thermal properties

#### Temperature / temperature range

-40 °C - 120 °C, short-term: 160 °C

#### Chemical resistance

Resistant to:  
Alcohols, mineral oils, greases, fuels

### Fire behavior

#### Fire behavior

Fire classification according to UL 94: VO self-extinguishing

#### Fire properties as per EN 45545-2

Classification: C.I.T. R22 / R23 HL3

Value: 0.61

Testing method: NF X 70-100-1/-2 600°C (1112 °F)

Classification: Ds (max.) R22 / R23 HL3

Value: 68

Testing method: ISO 5659-2 (25KW/m²)

Classification: LOI R22 / R23 HL3

Value: ≥ 32 %

Testing method: ISO 4589-2

#### Fire property according to NFPA 130

ASTM E 162, ASTM E 1354, ASTM E 662

Boeing BSS 7239, Boeing BSS 7242

Bombardier SMP 800-C

# Type ET-EN (end grommet)

[GO TO PRODUCT](#)

## Product information

The type ET end grommet is made of TPE and is used, for example, to close off the open end of a protective conduit, or as centering device for exiting lines.

The end grommet features the following advantages:

- Opening of end grommet variable (depending on the cable diameter used)
- Easy assembly
- Fixing of end grommet to the cable protection conduit using ribs around the inside
- Approved for railway technology (EN 45545-2)

### Product information

The GF-P braided conduits are made of specially modified polyester. With this material and the special braiding, the conduit is extremely durable and elastic in both the radial and axial directions. It can be used to bundle and protect a large number of cables and individual wires of all types. The elastic braiding means that configuration of the conduit can be very variable. The SAT-GF conduit connection serves as an end piece for the braided conduits.

Additional advantages of the GF-P braided conduit include:

- Very good mechanical and thermal resistance
- Good chemical resistance
- Very low levels of smoke gas
- Very high abrasion resistance

Specification:  
EN 45545-2.3x HL3

### Product information

The SAT-GF serves as an end piece for the braided conduits GF and GF-P. It consists of an outer sleeve and a separable inner sleeve and can therefore also be retrofitted. The braided conduit can therefore also be combined with the UHE conduit holder or the m-fix conduit fitting using the SAT-GF connection.

#### Advantages:

- Retrofitting without tools
- Seamless insertion of the braided conduit into a housing
- Cable protection with low weight

### Product information

The self-retracting fabric conduit with longitudinal slot provides excellent mechanical protection against abrasion for your lines. First off it prevents rattling even better, plus it can be installed at any place and at any time.

Additional advantages of the GF-P-LS braided conduit include:

- High mechanical protection
- Light-weight / low mass
- High flexibility
- Great chemical resistance
- Flame resistant

Specification:

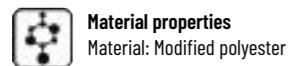

- EN 45545-2 2x HL3 1X HL2

### Product information

The highly dense and cable-friendly M-PRO P-VG-M conduit fitting with metal external thread is used for the quick and safe connection of corrugated conduits. It has excellent chemical resistance and is also suitable for outdoor use due to its UV and weathering resistance.

Further advantages:

- Tool-free assembly / disassembly of corrugated conduits
- High packing density
- High tear-out strength
- Vibration, shock and impact resistant

### Material properties

Material properties  
Material: Modified polyamide PA 6, Thermoplastic elastomer

### Protection class

IP protection rating  
IP54, IP66, IP66K, IP67, IP67M, IP68 up to 6 bar (30 min), IP69K

### Thermal properties

Temperature / temperature range  
-50 °C - 120 °C, short-term: 140 °C

### Chemical resistance

Resistant to:  
Alcohols, mineral oils, greases, fuels, alkalis, weak acids

### Conformity

ECE 324 R 118: Annex 6+8  
ECE 324 R 118

### Fire behavior

Fire behavior Fire classification according to UL 94: VO self-extinguishing

### Fire properties as per EN 45545-2

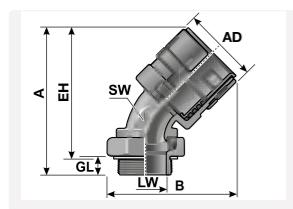

Classification: C.I.T. R22 / R23 HL3  
Value: 0.58  
Testing method: EN 17084

Classification: Ds (max.) R22 / R23 HL3  
Value: 57  
Testing method: ISO 5659-2 (25KW/m<sup>2</sup>)

Classification: LOI R22 / R23 HL3  
Value: ≥ 32 %  
Testing method: ISO 4589-2

Fire property according to NFPA 130

### Product information

The highly dense and cable-friendly M-PRO P-DVW 45°-M conduit fitting with metal external thread in 45° angle is used for the quick and safe connection of corrugated conduits. The 360° rotatable fitting has excellent chemical resistance and is also suitable for outdoor use due to its UV and weathering resistance.

Further advantages:

- Tool-free assembly / disassembly of corrugated conduits
- High packing density
- High tear-out strength
- Vibration, shock and impact resistant

### Product information

The highly dense and cable-friendly M-PRO P-CVW 90°-EMV conduit fitting with metal external thread and integrated cable fitting with strain relief in 90° angle is used for the quick and safe connection of corrugated conduits and cables. It has excellent chemical resistance and is also suitable for outdoor use due to its UV and weathering resistance.

Further advantages:

- Tool-free assembly / disassembly of corrugated conduits
- High packing density
- High tear-out strength
- Vibration, shock and impact resistant

### Product information

The KFW bulkhead fittings are made of specially modified polyamide 6. The material is self-extinguishing, and halogen, phosphor and cadmium-free.

With the KFW/D and KFW/X bulkhead fittings, the cable protection conduits EW with standard corrugation and EWX with high corrugation can be directly mounted.

The KFW bulkhead fittings feature the following advantages:

- System divided in two for very quick and easy installation of cables
- Subsequent installation of cables is simplified by the removable upper part
- Gasket included in delivery
- No extra fittings are required

Specification:

- EN 45545-2 3x HL3

### Product information

The UHE holder is a one-piece corrugated conduit holder in which the lid is connected to the holder by a film hinge. It is manufactured from a specially modified Polyamide. The material is halogen, phosphor and cadmium-free. The holder is used to fix cable protection conduits to equipment and machinery.

The UHE holder features the following advantages:

- Quick assembly thanks to single-hole fixing
- Protective conduits only need to be snapped on, which makes them excellent for overhead installations.
- Optimum connection of conduit to holder thanks to double webs of holder
- Optimized axial strain relief of the corrugated conduit achieved with integrated double webs
- Highest degree of retention power.
- Suitable for all Murrflex corrugated conduit profiles.

### Product information

The stable UH-S holder is made of specially modified polyamide 6. The material is halogen, phosphor and cadmium-free. The UH-S holders, which can be strung together and stacked, are ideally suited to applications with special requirements in terms of stability. Equipped with the appropriate cable protection conduits, the UH-S holders offer excellent performance in terms of stability, flexibility of use and durability – even under high dynamic loads.

The UH-S holders M20/P16 to M63/P56 feature the following advantages:

- Safe closing of the holder with no tools required
- Machine safe, can only be opened with a tool
- The upper part can also be secured with screws if necessary
- Lower part can be pre-assembled
- Suitable for all Murrflex corrugated conduit profiles.

The UH-S holders in the sizes M10/P07 to M16/P11 are to be fixed with two screws, screws are not included in the delivery.

## Type RAB

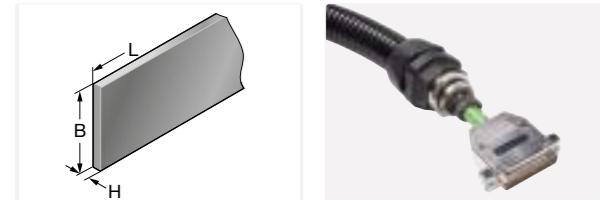

[GO TO PRODUCT](#)

### Product information

The RAB 30 room integrity strip is made of a special reactive material. The flexible material expands in three dimensions from about 190° C, producing a thick foam in the event of a fire that seals off the opening into which the RAB 30 is inserted.

#### Applications:

- In conjunction with the murrplastik m-top conduit fittings with metal thread
- Control cabinet or control box, preferably for the railway industry

### Information, conformities and approvals

RoHS

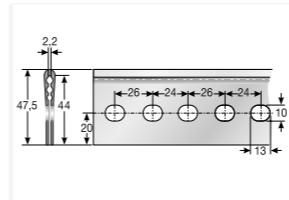

## Edge protection profile

[GO TO PRODUCT](#)

### Product information

The KSP 47.5 edge protection profile is manufactured of specially modified thermoplastic rubber. Materials are self-extinguishing, halogen-free and tested according to EN 45545-2 standards.

Exceptional mechanical properties characterize the edge protection profile, it is abrasion-proof and fixed on a pre-set hole pattern.

# Cable entry systems and holders

## Cable entry systems

Cable entry systems are used wherever there is a high packing density of cables and cords that need to be led through control cabinets or component walls.

A large number of different cables with greatly varying diameters may be led through a very tight space through the walls of a control cabinet with a high degree of protection (IP 65 and higher). All cable entries with the add-on -EN meet the fire protection requirements of EN 45545-2 3x HL3.

The requirements for fire closure according to EN 45545-3 as per DIN EN 1363-1:2012-10 are met by the cable entry systems with special fire protection elements. This far exceeds the required values of T= 15 min: E60; I45; W45.

## Cable entry plates

Cable entry plates are available in a wide range of variants for cables without connectors. With "KDP on Demand", we are the only company in the world to offer cable entry systems that are completely customized: in size, shape, material and hole pattern, also for small series. Cable entry plates can be designed as fire protection bulkheads with room integrity mats.

ON DEMAND

## Cable Entry Systems

Cable entry systems are split systems that allow pre-assembled cables with connectors to be inserted into a housing, for example. All systems are matched to standard cutout sizes of 16- or 24-pin connectors from Harting and Wieland. A room integrity set is also available for cable entry systems, which provides a fireproof seal for the device housing in the event of a fire.

## Strain relief

Strain reliefs as universal cable holder systems enable defined routing and fastening of cables and wires. They are available in several sizes depending on the number of cables and with different mounting options. The inserted metal sleeves allow them to be fixed directly with screws or rivets. The slot nut version facilitates quick and universal mounting on various C-rails. In the version as a cable fixing plate, they are simply snapped onto 35 mm standard top hat rails. All our cable retaining system products, ZL... and KAF..., are in compliance with the requirements of EN 45545-2 3x HL3.

## EMC components

Precisely fitting EMC modules are available for all cable entry and cable retaining systems, as well as discharge plates and cable fixing plates that reliably dissipate interference. In addition, a wide range of other EMC components can be selected.

## KDP on Demand

**Your custom cable entry plate****Any number of cable entry variations  
can be realized upon request**

Whether octagonal, round or oval, whether 1 x 1 cm (0.39 x 0.39 in) or 1.5 x 3 m (1.64 to 3.28 yd / 4.92 to 9.84 ft), whether for 111 cable entries and/or 888 cable fittings, whether for cables with or without connectors, whether for ribbon cables, electric high-power cables or pneumatic hoses, or for any combination of the above: With the "Cable Entry on Demand" Murrplastik Systemtechnik offers the first cable entry system that is completely customizable in terms of size, shapes and features.

**Request, order and delivery within just a few days**

The "KDP on Demand" can be configured in just a few steps on [www.mp4you.de](http://www.mp4you.de). You may also submit a CAD drawing with all the technical specifications online.

Details, such as specifications of the desired cut-out sizes and shapes, the hole pattern, the number of cables to be fed in, and all the required information about cable diameters may be transferred in this way.

Furthermore, additional information on the throughput of pre-assembled cables, an added strain relief, a firewall or an EMC moduis always available.

## Cable entry plate plastic type KDP/EN

[GO TO PRODUCT](#)

### Product information

Plastic cable entry plate with two elastomer plates

- Approved for railway technology (EN 45545-2 / 3x HL3 / NFPA 130)
- Economical connection technology for tool-free wiring of equipment and machinery
- The alternative to cable fittings
- Very good strain relief
- Protection class: IP 65
- Thermal stability: -60 °C to +70 °C
- Material: Frame: Polyamide 6.6 / Seal: TPU/NBR/EPDM
- RoHS compliant
- UV resistant
- Made in Germany

In railroad technology mounting is only permissible by screwing on  
Suitable for standard cut-outs for 24-pin industrial connectors

## KDP/EN-RA cable entry plate, plastic

[GO TO PRODUCT](#)

### Product information

Cable entry plate made of modified polyamide 6 especially for the railway industry

- Approved for railway technology (EN 45545-2 / 3x HL3 / NFPA 130)
- Economical connection technology for tool-free wiring of equipment and machinery
- Very good strain relief
- Protection class: IP 65
- Material: Frame: Polyamide 6 / Seal: EPDM
- RoHS compliant
- UV resistant
- Made in Germany

The fire protection mat, enclosed in the supply, reacts at temperatures exceeding 160 °C (320 °F) by expanding and thereby closing off the opening completely fire resistant.

In railroad technology mounting is only permissible by screwing on  
Suitable for standard cut-outs for 24-pin industrial connectors

## Cable entry plate type KDP EMV Module

[GO TO PRODUCT](#)

### Product information

The KDP 24 EMV module is designed to dissipate conducted and field induced interference. The KDP 24 EMV modules are used in conjunction with the cable entry plates type KDP/X 24 and KDP/N 24 in order to ensure optimum performance, the EMC module is assembled in combination with the cable entry plate KDP/...24. While the EMC module makes direct contact with the enclosure wall on the inside of the enclosure, the KDP/...24 cable entry plate provides mechanical protection against dust and liquids from the environment.

The special advantages of the KDP 24 EMV modules are:

- Cable-friendly 360° shield contacting
- Large contact area with short distance
- Very easy assembly
- Compact and slim design
- Visible contact area
- Stainless steel construction

## KDP/EN-RA cable entry plate, metal

[GO TO PRODUCT](#)

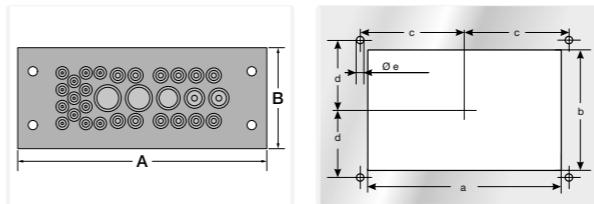

### Product information

The KDP/EN cable entry plates are cable entry and retaining systems for cables and pneumatic hoses, used in control cabinets or plant construction specifically in the railway industry. Wherever quick assembly, cable-protecting and high packing density are required, the cable insertion system is used.

The special benefits of the KDP/EN metal are:

- Enormous time savings in assembly
- High packing density
- Protection category IP 65
- Approved for railway technology (EN 45545-2 / 3x HL3 / NFPA 130)

- Other variants are available on request -

## KDL/E+ cable entry system

[GO TO PRODUCT](#)

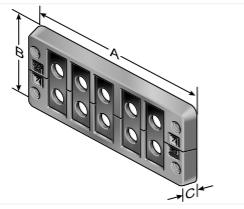

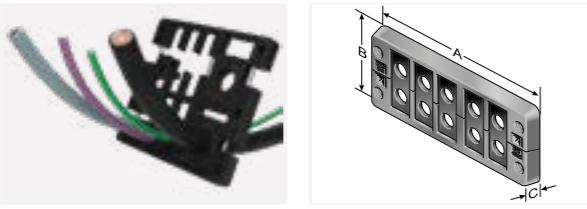

### Product information

The flexible cable entry system for the insertion of pre-assembled cables with a frame closed at the top.

- Stackable
- Easy assembly
- High packing density
- Integrated strain relief
- Protection class: IP 65
- Thermal stability: -40 °C – +100 °C
- Fire classification: V0
- RoHS compliant
- UV resistant
- Made in Germany

Suitable grommet: KDT/ZE und KDT/ZE+

## Cable entry grommet type KDT/ZE+

[GO TO PRODUCT](#)

### Product information

Cable entry grommet for pre-assembled cables in connection with cable entry system KDL/E+

- Approved for railway technology (except special grommets)
- The grommets are retrofitted around the cable
- Strain relief even better with simple cable ties
- Thermal stability: -40°C to 100 °C (special grommets: -40°C to 80°C)
- Fire classification: V0 (special grommets: HB)
- RoHS compliant
- UV resistant
- Made in Germany

## KDL/D-EN cable entry system

[GO TO PRODUCT](#)

### Product information

The robust cable entry system for the feed-through of pre-assembled cables!

- Approved for railway technology (EN 45545-2 / 3x HL3 / NFPA 130)
- 2-piece or 3-piece frame
- Easy assembly
- High packing density for up to 48 cables
- Integrated strain relief
- Protection class: IP 65 (with suitable grommets and cables)
- Thermal stability: -60 °C - +100 °C
- Fire classification: V0
- Material: Frame: PA / Block: TPE
- RoHS compliant
- UV resistant
- Made in Germany

Fits standard cutouts for 24-, 16-, 10- and 6-pin industrial connectors as well as two special sizes (single row and round M50)  
suitable grommet: KDT/X-EN

## KDT/X-EN cable entry grommet

[GO TO PRODUCT](#)

### Product information

2-piece cable entry grommet for pre-assembled cables in connection with cable entry system KDL/D-EN and KDL/H-EN

- Approved for railway technology (EN 45545-2 / 3x HL / NFPA 130)
- Pre-assembled cables can be easily inserted or fed through e.g. in control cabinets.
- The grommets are retrofitted around the cable
- Thermal stability: -30 °C – +100 °C
- Fire classification: V0
- Material: TPE
- RoHS compliant
- UV resistant
- Made in Germany

## Type RAS room integrity set

[GO TO PRODUCT](#)

### Product information

The RAS Room integrity set is used in conjunction with the KDL/C or KDL/D and KDL/H cable entry plates. Because the system can be split apart the RAS room integrity system can be completely retrofitted on the inside of the housing. The fire protection mat reacts at temperatures exceeding 160°C (320 °F) by expanding and thereby closing off the opening completely fire resistant.

Special benefits of the RAS room integrity system are:

- Approved for railway technology (EN 45545-2 / 3x HL3 / NFPA 130)
- Room integrity (firewall)
- Completely splittable system
- Quick and easy assembly

## Cable fixing plate type KAF

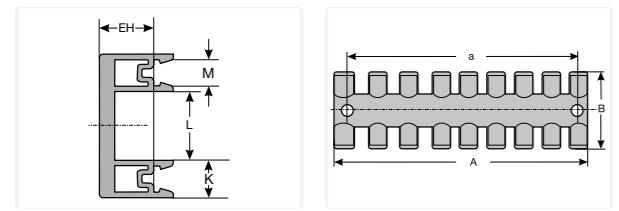

[GO TO PRODUCT](#)

### Product information

The KAF cable fixing plate is suitable for simultaneously holding and relieving the strain of cables in the control cabinet.

Designed to be mounted on a standard 35 mm top-hat rail (EN 50022; Niedax 2934;2936) or on a C-rail (Niedax 2970;2971). The assembly is done by simply snapping on.

- Approved for railway technology (EN 45545-2 / NFPA 130)

## Strain relief on C-rails

### General information

The strain relief plates ZL-C, ZL-SW, ZL-AM and ZL-DB are based on the strain relief plate ZL. They are used for fixing of and providing strain relief to components such as wire bundles and conduits on C-rails, using cable ties.

The pressed-in brass washers prevent the cold flow properties of the plastic under heavy and permanent vibration and center the strain relief. Suitable slot nuts and bolts enable simple assembly on various C-rails.

- Very fast installation
- Orderly routing of the cable
- Simple and effective strain relief through cable ties
- Approved for railway technology (EN 45545-2)
- Partly with thread coating and self-locking lock nut

	ZL-C	ZL-SW	ZL-AM	ZL-DB

## EMC components with excellent discharge

### SHIELD CLIPS EMC

The steering components in today's machine, plant and control cabinet installations are becoming more and more complex. A good EMC concept therefore gains increasing importance. murplastik earthing and cable shielding products are designed to meet the demands for low bleeder resistance at high frequencies. All products are characterized by their very easy handling.

- Spring action provides uninterrupted contact pressure with the shield.
- High conductivity
- Excellent discharge of high-frequency noise current

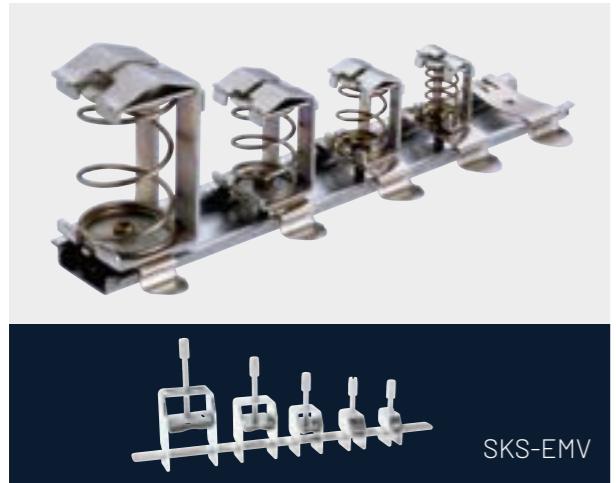

### DIVISIBLE CABLE ENTRY SYSTEMS

The KDL/EMV cable entry system is based on the KDL cable entry system and can be retrofitted. A conductive surface allows cable sheath interference to be discharged onto the control cabinet simply and without additional aids.

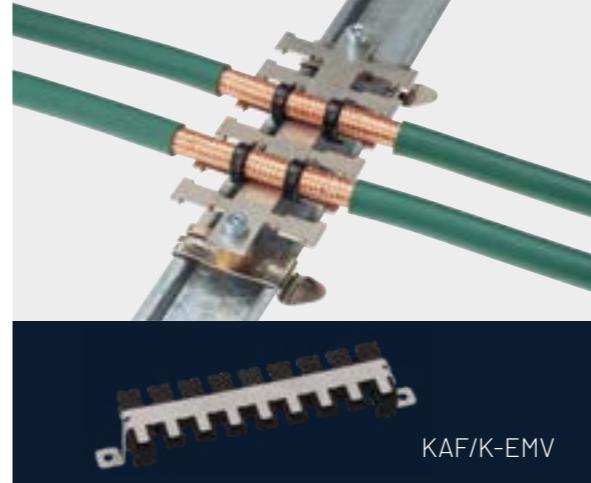

Field-related interferences are securely discharged by the metallization.

The types KDL 16 /xx-EMV fit 16-pin cut-outs for connectors from Harting or Wieland. For 24-pin cut-outs for connectors there are the types KDL 24 /xx-EMV.

### SHIELDING CLAMPS

The **shielding clamp** may be used where the shield of individual cables must be connected with the ground potential. The SK can be either screwed down on the mounting plate or snapped on to the 35 mm top hat rail (EN 50022) by means of a mounting foot.

### CABLE FIXING PLATES

The cable fixing plate KAF/SF is suitable for discharging interferences which may occur on cable sheaths. The earth/ground contact is provided through a special snap-on foot for the 35 mm top-hat rail (EN50022). Stripping the cable in the area of the KAF/SF and clamping in the KAF/SF achieves a contact to the KAF/SF. The snap-on clip produces a low-resistance ground contact. The use of two connecting points ensures a good discharge regardless of the position of the cable on the KAF/SF.

- Fits on 35-mm top-hat rail (EN50022)
- Simply snap-on
- Also available are discharge plates for KAF cable fixing plates and ZL strain reliefs

### DISCHARGE PLATES

The **discharge plate** is suitable in conjunction with all variants of the cable entry plate KDL and the standard types of the cable entry plate KDP for discharging interference that may occur on the cable shields. The discharge plate should be installed on the inside of the control cabinet, directly to the fixing points of the cable entry system.

In addition, the **KDP EMC module** also provides you with a precisely fitting, cable-protecting and extremely compact solution for cable entry plates.

### CONDUIT FITTINGS M-PRO-EMV

The M-PRO fitting series was developed together with leading rail vehicle manufacturers.

- High level of tightness at IP 68 to 6 bar and at the same time IP 69 K without any add-on components to DIN EN 60529
- Quick assembly: Insert conduit, snap-in → ready
- No parts can get lost → Delivered completely assembled
- Clamping along entire circumference, ensuring maximum tensile strength

All fittings meet the specifications of EN 45545-2 with a Class R22 and R23 ranking according to hazard level 3xHL3 as well as NFPA130.

# Labeling of single wires, cables, conduits and devices

## Labeling

We are the only manufacturer worldwide to offer all labeling technologies as well as the "Label on Demand" service. Our labels can be used in a variety of ways: For single wires, cables, switchgear, terminals, type plates, push buttons, conduits as well as control and signal devices.

## Ensuring you meet the standard

European standard EN 60204 (VDE 0113 Part 1) stipulates the unique identification of cables, components and terminal blocks in control cabinets.

This identification must be legible into the long term and undetectable. Labeling systems from murrplastik meet these requirements.

## murrplastik can be used to label

- Single wires
- Terminals
- Switchgear
- Device locations
- Control and signal devices
- Components
- Type plates

from a wide range of manufacturers.

Subsequent marking of cables and wires is also possible.

All data processing is done by the mp-UniversalMarkingSoftware. Data import routines for CAD/CAE packages support the project-specific import of labeling information.

murrplastik has a wide range of direct and subsequent wire and cable labeling products.

## Properties of the murrplastik products

- Extremely durable
- Resistant to environment influences and mechanical stress
- Undetectable
- Wide range of attachment options
- Label retrofitting possible
- Variety of shapes and equipment
- Labeling with QR and bar codes

## Labeling material

- Label sleeves
- Label holders
- Label plates
- Single wire labeling without grommets
- Type plates
- Sheet labels
- Cable ties and accessories

## Engraving material

- Alu-, Duo-, Triomatt multi-layer material
- Anodized aluminum
- Stainless steel

## Labeling - Material & Application

Material	Application	Material	Application
<p><b>KTH AND KTH/Q label sleeve</b></p> <ul style="list-style-type: none"> <li>• Halogen-free</li> <li>• High packing density</li> </ul>		<p><b>Self-adhesive sheet labels</b></p> <ul style="list-style-type: none"> <li>• Thermal transfer labels</li> <li>• Ink Jet labels</li> <li>• Laser label foil</li> </ul>

## Labeling - Technologies

Murrplastik Systemtechnik is the only company that offers all labeling technologies in its product portfolio (laser, printing, plotting and engraving). All technologies can be controlled with a single software (mp-UniversalMarkingSoftware).

The portfolio of our labeling devices ranges from transportable devices for the service sector to stationary units with various equipment options for continuous professional use. We have the right hardware for every

labeling need. Our labels for subsequent labeling KNC, KNQ and KSM made of polycarbonate can be labeled with murrplastik labeling technologies plotting, laser and inkjet. The KSM labels made of polypropylene are exclusively suitable for laser labeling with the devices of the mp-LM series.

## mp-UniversalMarkingSoftware

The mp-UniversalMarkingSoftware offers you many features and functions for the simple and optimal creation of labeling projects.

- Support of common graphic formats (bmp, png, jpg, wmf, hpgl, plt)
- Enhanced symbol library
- Data import from a range of CAD
- Data management via project explorer

### All in all, your benefits include:

- Process optimization
- Time saving
- Cost reduction
- Clear-cut workflows

### Selection of printed/non-printed datasets

Targeted selection of already printed/not yet printed datasets, so as to optimise your workflows.

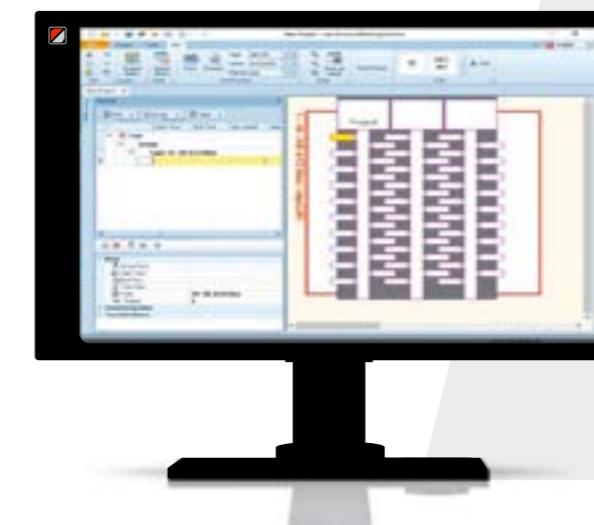

### Status bar icons

Direct access to frequently used program modules such as system parameters, printer settings, parameter editor via icons in the status bar.

### Product information

In addition to its contemporary graphical interface the mp-UniversalMarkingSoftware provides several added value for the user. These are:

- Interactive work
- Improved performance
- More stable system
- Improved user guidance
- Interactive print preview

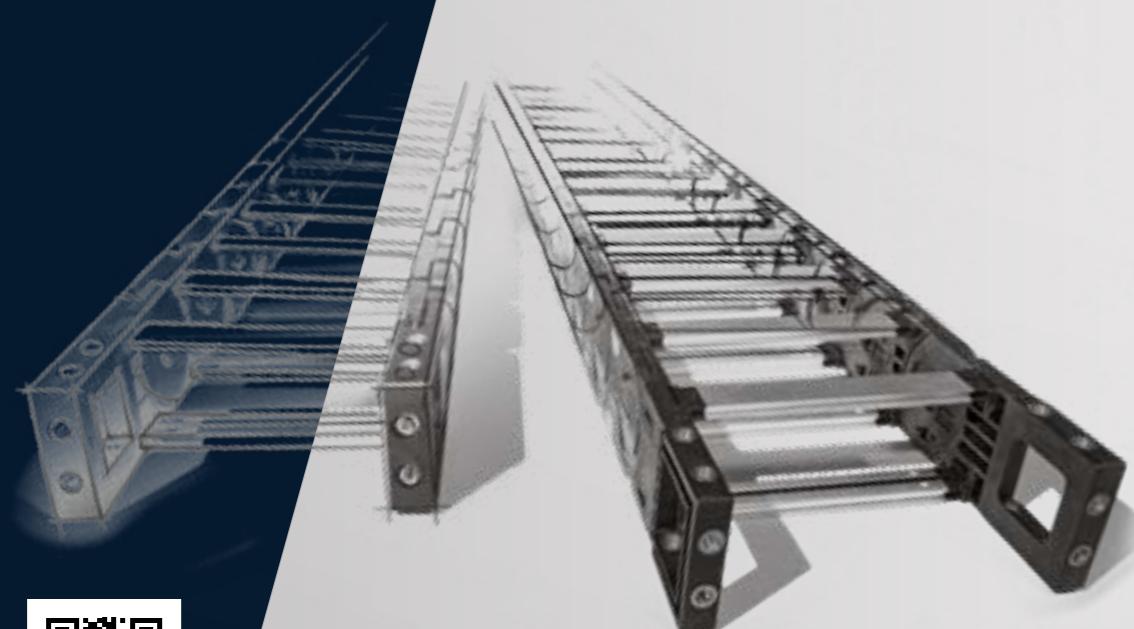

# Energy chains

Our energy chains are used wherever there are wires and cables that have to be flexibly guided. For example, door controls and slide-out battery trays.

On request, these products may be manufactured of a material that meets the requirements of EN 45545-2 3x HL3.

## murrplastik CHAINBUILDER

- Quick selection of the right energy chain for your application
- User friendly configuration of mounting components such as separators, shelves, chain brackets and strain relief
- Optional direct entry of the order key with subsequent configuration option
- Automatic generation of the 3D CAD model by means of an interface to Cadenas
- Save, load and manage your configurations.

Service

# Working together to develop and implement solutions.

## The complete solution.

**Strong together.**

murrplastik® at your side

In our complex and fast-moving world, the development of innovative solutions and a comprehensive understanding of the challenges of tomorrow determine which companies will continue to be successful in the future.

**Our promise:**

**Customized system solutions in an automated world.**

In addition to the fast and uncomplicated provision of individually manufactured components and complete systems, we work on your projects with you.

**Together with our experts from different departments, we develop the perfect solution for your requirements and ensure long-term growth.**

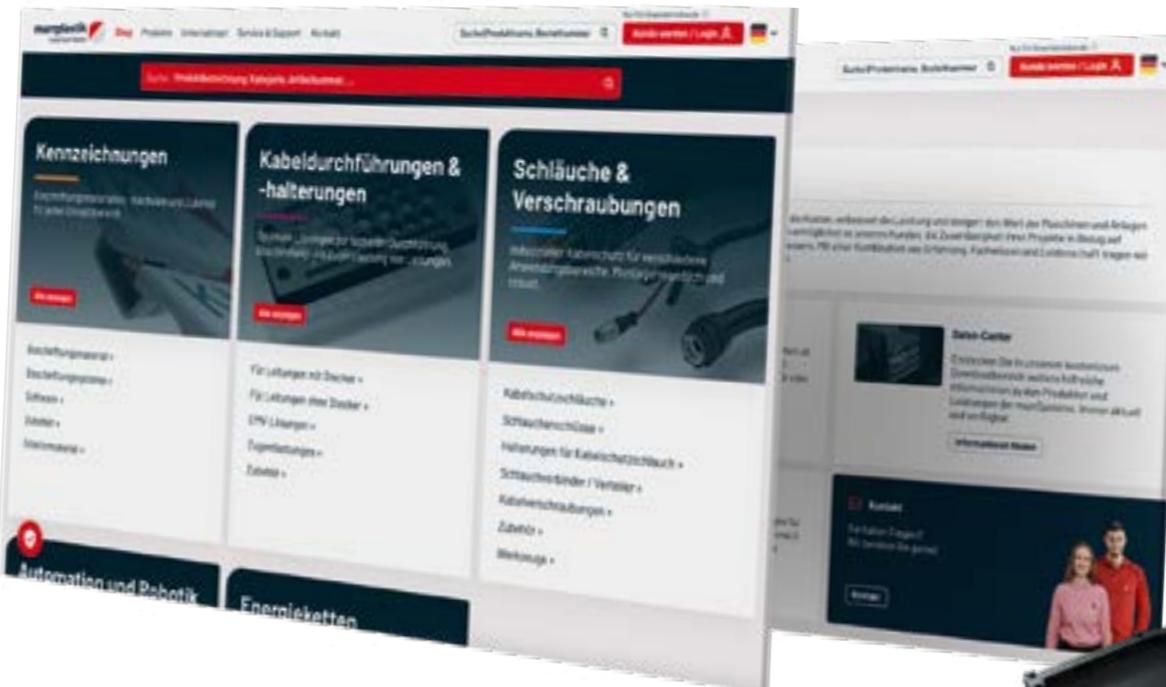

Webshop

# Simply Smart Systems

[shop.murrplastik.de](http://shop.murrplastik.de)

**Are you already familiar with the murrplastik® online shop?** There, you will find a practical overview of all our products. Additional information and smart functions, such as individual configuration and 3D models, will help you in your selection and ordering.

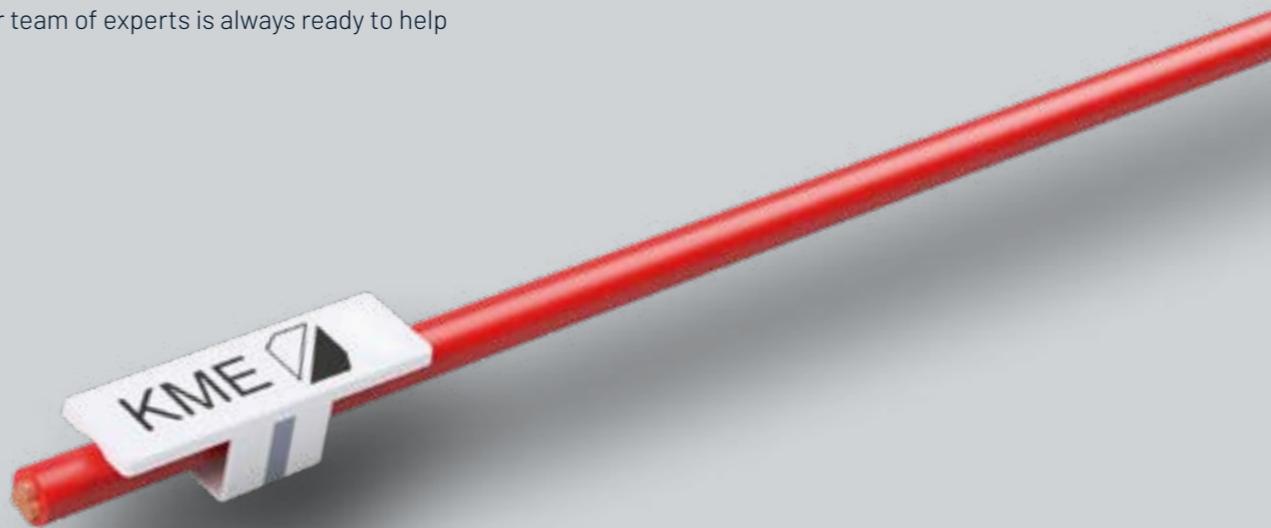

## Award-winning Performance

Our innovative strength impresses not only our customers. Several products have received the German Innovation Award. What a distinguished way to highlight our experts' outstanding performance.

## Your benefits at a glance:

- ✓ **Subscribe** – Order your products at your own pace and in the quantity you need
- ✓ **Create quotations** – Easily create and save your own quotation
- ✓ **CAD-Data** – View and download individual 3D models of your desired product
- ✓ **Product details** – see all relevant details about our products at a glance
- ✓ **Service & Support** – If you have any questions, our team of experts is always ready to help
- ✓ **Set your desired delivery date** Choose your individual delivery dates easily and conveniently
- ✓ **Express shipping for urgent deliveries** We are there for you, even when it has to go quickly
- ✓ **Order again** – Store your orders under "My account" to quickly find and duplicate any orders already placed

## Our range for railroad and rail transport at a click

Energy chains, labeling systems, cable entry systems, corrugated conduits and more. The innovative world of murrplastik® is just a click away. Simply open **shop.murrplastik.de** in your browser or scan the QR code.
