

Accessories

Type ET (end sleeve)

-40 to +120 °C
Short periods +150 °C

Thermoplastic elastomer

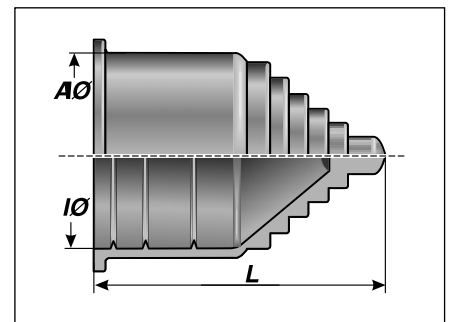

HB

IP 67

The end sleeve can be used to close the open end of a conduit or to centre cables coming out of a conduit.

- Opening of end sleeve variable (depending on the cable diameter used)
- Easy assembly
- Fixing of end sleeve to the cable protection conduit using ribs running round the inside
